

Hackathon Contributions

Team members: Muhammad Amjad, Isabela Barton, Maggie Crowner, Natalie Seah, Erin Siedlecki

Muhammad:

- Selecting the best metrics to evaluate
- Devpost setup
- Final write-up and README file
- Slideshow
- Video demonstration planning and recording

Isabela:

- Selecting the best metrics to evaluate
- Scorecard writing
- Verifying translations
- Evaluation of robustness and cross-lingual distribution
- GitHub setup and maintenance

Maggie:

- Selecting the best metrics to evaluate
- Sampling from large data set
- Coding for data wrangling, introducing noise and translations
- Scorecard writing
- Final write-up

Natalie:

- Selecting the best metrics to evaluate
- Kaggle API and Hugging Face token setup
- Scorecard writing
- LLM-as-judge conceptual plan and coding
- Evaluation of sycophancy, attack success rate, and explainability

Erin:

- Initial domain proposal and procedure draft
- Selecting the best metrics to evaluate
- Facilitating division of labor
- Coding for base model and instruction-tuned model using Gemma
- Final write-up
